

Moaz Ali

Software Engineer | Full Stack Developer | Web Application Developer

+92 3137929467 moaz55397@gmail.com [LinkedIn](#) [Portfolio](#)

SUMMARY

Computer Science graduate and Full Stack Developer with experience in building web applications using Django, Vue.js, and REST APIs. Passionate about developing scalable software solutions and solving real-world business challenges through technology.

Skilled in Python, Django, Vue.js, Quasar Framework, REST APIs, and database design with PostgreSQL/MySQL, with hands-on experience in end-to-end application development.

Currently seeking opportunities to work on impactful software products where I can grow as a developer and contribute to building high-quality, scalable digital solutions.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML5, CSS3

Frameworks & APIs: Django, Django REST Framework, Vue.js, Quasar Framework, REST APIs

Tools & Platforms: Git & GitHub, PostgreSQL, MySQL, Render, VS Code, Postman

Other: Full Stack Development, AI Integration, SaaS Development, Database Design, Software Architecture, Responsive Web Design

EDUCATION

Bachelor of Science in Computer Science (BSCS)

2021 – 2022

Government College University Faisalabad

ICS

2019 – 2022

Unique Group of College, Lahore

EXPERIENCE

Web Developer

Tech Hyves

June 2025 – Present Lahore, Pakistan · Remote

- Worked as a Web Developer on real-world web applications using modern full-stack technologies.
- Developed and maintained frontend and backend features for scalable web systems.
- Contributed to API integration, UI improvements, and system optimization in a remote team environment.

Frontend Developer Intern

PKLogix

Oct 2022 – Dec 2022 Lahore, Pakistan · Remote

- Completed a 3-month internship focused on Frontend Development using Vue.js.
- Built responsive and reusable UI components and worked on real-world frontend features.
- Collaborated with developers to integrate APIs and improve user interface performance.

PROJECTS

School Management System

- Developed a complete school management solution for handling students, teachers, attendance, and academic records.
- Created role-based access control for administrators, teachers, and students.
- Automated academic and administrative workflows.

Doctor Appointment System (DAS)

- Developed a complete doctor appointment booking system using Django and Quasar Vue.js.
- Implemented doctor filtering, appointment scheduling, token management, and receipt generation.
- Designed separate dashboards for patients and doctors.
- Integrated real-time appointment tracking and estimated waiting times.

Candidate Test Management System

- Developed a web-based system to manage candidate assessments, test scheduling, and result tracking as part of a technical evaluation project.
- Implemented core features like candidate registration, test assignment, scoring logic, and result display.
- Focused on clean UI, role-based access, and structured data flow between frontend and backend.
